

Targa 44

AFT DOOR VERSION

The layout options to choose from for our largest model Targa 44 have again grown.

For deliveries 2014 onwards Targa 44 can be delivered as an *Aft Door* version which will have a glass sliding door between the pilothouse and the aft deck. This will make moving between indoor and outdoor space easier and also make the wheelhouse feel brighter and more roomy. It also features a slightly longer flybridge and fixed stairs to the flybridge on the port side of the aft wall.

When it comes to the flybridge and the *Hard Top* roof (extra equipment) over the aft deck, the *Aft Door* version offers the same alternatives as other Targa 44 versions – a long or a short *Hard Top* roof for dinghy storage, protection of the aft deck area and for sun bathing.

With the new *Aft Door* version the Targa 44 can reach a new segment of customers. This door alternative also gives the professional users – taxi, sightseeing, charter etc. – an interesting alternative.
